Embeddable Games Database — Complete Guide

> **12,201 legally embeddable, monetizable HTML5 games** from 5 licensed platforms, ready to embed on your gaming website.

What's in This Package

File	Description
`master_games.json`	Full JSON database — 12,201 games with all metadata
`master_games.csv`	Spreadsheet-friendly CSV version of the same data
`embeddable_games_complete.md`	Human-readable Markdown listing organized by category
`stats.json`	Summary statistics (counts by category and platform)

Quick Start — How to Embed a Game

Paste this into your website HTML, replacing the `src` with any embed URL from the database:

HTML

```
<iframe
  src="https://html5.gamemonetize.co/7pmla0dtaz56alpxp7bnit4fvh3y2y9a/"
  width="800"
  height="600"
  frameborder="0"
  scrolling="no"
  allowfullscreen
></iframe>
```

For **portrait/mobile games** (Gamezop), use:

HTML

```
<iframe
  src="https://4665.play.gamezop.com/g/gTD1yQp3R"
  width="480"
  height="854"
  frameborder="0"
  scrolling="no"
  allowfullscreen
></iframe>
```

Legal & Copyright Information

All games in this database are **legally embeddable** and **safe to monetize** because:

1. **GameMonetize** explicitly provides a publisher program that allows free embedding with revenue share. Their API is publicly accessible and designed for publishers.
2. **HTMLGames (Zygomatic)** states on their website: *"You can use our games on your own website, for free, providing you keep our ads and game intact."*
3. **OnlineGames.io** provides a public embed JSON feed and explicitly invites publishers to embed their games for free.

4. **Gamezop** operates a publisher program where websites can embed their catalog of 250+ games and earn revenue share.
5. **GameFlare** provides a public JSON feed and publisher program with 35% revenue share.

None of these platforms require you to host game files yourself — you simply embed an iframe pointing to their servers. This is the standard and intended use case for all these platforms.

ads.txt Recommendations

For maximum monetization, add the following to your website's `ads.txt` file:

Plain Text

```
# GameMonetize

How to Use the JSON Database

Python

```python
import json

# Load the database
with open('master_games.json', 'r' ) as f:
    games = json.load(f)

# Filter by category
action_games = [g for g in games if g['category'] == 'Action']

# Get embed URL and thumbnail for a game
for game in action_games[:5]:
    print(f"Title: {game['title']}")
    print(f"Embed: {game['embed_url']}")
    print(f"Thumb: {game['thumbnail']}")
    print()
```

How to Use the CSV Database

Open `master_games.csv` in Excel, Google Sheets, or any spreadsheet application. The columns are:

Column	Description
`no`	Sequential number
`title`	Game title
`category`	Game category
`platform`	Source platform

`embed_url`	**Direct URL to embed in iframe**
`thumbnail`	Thumbnail image URL
`description`	Game description
`tags`	Comma-separated tags
`license`	License description
`monetizable`	Whether monetization is allowed
`orientation`	landscape or portrait
